Summary

Frontend Engineer and Tech Lead with 5+ years building scalable, high-performance web products. Self-taught — grew from scratch to leading teams and owning frontend architecture and system design end-to-end. I code hands-on, mentor developers, and take products from idea to production. Passionate about UX quality, web performance, and component-driven development.

Work Experience

Frontend Engineer & Tech Lead **Mecalux** May 2024 – Present

Barcelona, Hybrid · World leader in storage systems market — software used by industrial engineers

- Led a team of 2–3 frontend engineers: code reviews, technical standards, and onboarding — hands-on throughout
- Owned system design and architecture for internal web tools built from scratch — complex, data-heavy apps used daily by sales engineers globally to configure and quote industrial solutions
- Migrated legacy codebase to Next.js + TypeScript, eliminating tech debt and improving long-term maintainability
- Designed and built a reusable component library: standardised UI across the platform and reduced duplicated code
- Delivered training sessions on React, TypeScript, Next.js & Tailwind — team went from dependent to fully autonomous
- Introduced code review culture, reducing production incidents and improving release confidence

Stack: Next.js · React · TypeScript · Tailwind CSS · JavaScript · Figma · Websockets · Copilot AI

Frontend Developer **Eunoia Digital** Jun 2022 – May 2024

Barcelona, Hybrid · Digital product agency — e-commerce, fintech, automotive, healthcare, NFT

- Delivered production-ready web apps for clients across 5+ industries simultaneously, owning frontend end-to-end
- Built an AI-powered tool for a global enterprise client using Next.js + OpenAI APIs — scoped, built, and shipped independently
- Led frontend for a Shopify e-commerce platform — implemented SEO strategy that boosted organic engagement
- Migrated 3 client projects across Next.js v12 → v13 → v14 with zero production regressions
- Technical reference for junior devs: code reviews, pair programming, unblocking and raising team standards

Stack: Next.js · React · TypeScript · JavaScript · HTML5 · SCSS · Tailwind CSS · Shopify

Frontend WebApp Developer **Movetia (SEAT / CUPRA)** Sep 2021 – Jun 2022

Barcelona, Hybrid · Embedded within SEAT S.A. internal engineering team

- Shipped CUPRA in-car connectivity web features from development to production — used by real drivers in real vehicles
- Joined a large corporate team with no prior experience; learned Angular end-to-end and delivered independently from week one

Stack: Angular · TypeScript · HTML5 · CSS · JIRA · Agile/Scrum

Technologies

Frontend: React · Next.js · TypeScript · JavaScript (ES6+) · HTML5 · Tailwind CSS · SCSS · Vite · Microfrontends

Tooling: Git · GitHub Actions · CI/CD · Figma · Jest · React Testing Library · N8N · Agile/Scrum · Jira

Languages: Spanish (native) · Catalan (bilingual) · English (professional working proficiency)

Projects

Mr. Volt · [mr-volt.vercel.app](#) 2026

- AI-automated news aggregator for the Spanish EV industry — fully automated content pipeline with zero manual intervention
- Built with N8N workflows for real-time content ingestion · Vite · React · Tailwind CSS

AleX — Crypto Analytics Terminal · [ale-x.vercel.app](#) 2026

- Real-time dashboard with live price streaming, interactive charts & ⌘K command palette
- CoinGecko REST + WebSocket APIs · Custom architecture · Next.js · React · TypeScript · Deployed on Vercel

Education

B.Sc. Computer Science, Universitat Politècnica de Catalunya (UPC), Barcelona 2016–2021
